

GROUP PROFILE

LOCUM INTERNATIONAL GROUP

GROUP DESCRIPTION - PHARMA

Locum International Group is a multinational limited liability Pharmaceutical Research Association incorporated in Switzerland supplying R&D Scale-up, Process Qualification and Manufacturing/control Applications to Pharmaceutical R&D and Manufacturing Companies world-wide. The Groups business is to promote the client's complete drug pipeline from development, manufacture, to end product registration.

Markets Served

Locum serves pharmaceutical companies world-wide in drug development, optimization, process qualification, scale-up, pivotal, validation manufacturing and control applications to final product registration. The Group's pharmaceutical technology is utilised by multinational clients in over 42 countries and offers key drug development programmes and drug product testing databases on generic drug products.

Pharma Technologies

The Group specialises in pharmaceutical drug development, technical data publications, (print and electronic) and drug development technologies through a range of universities and research associations as members of the International Drug Development Association (IAGIM). Locum covers the full spectrum of Drug Development, Drug Testing and Drug Registration Systems for both US and EU requirements.

Group Facilities

Locum Drug Development, Testing Facilities and Publication Divisions are situated in RSA, Switzerland and Israel with publication, marketing and sales agencies in Canada, France, Germany Holland, Italy, Japan, UK, and the US.

Drug Development Association

IAGIM serves pharmaceutical companies on a global forum via three main geographic technology zones (US & Canada; EU and Pacific Rim.) and functions as a unique Drug Development Association dedicated to its 2800+ members and clients <http://www.iagim.org>

Publishing

The International Group Publishing Division offers an exceptional wide variety of Pharmaceuticals Journals, Development Handbooks (24 and 120+ volume series) Directories, Drug Reports, Protocols and Publications covering aspects of drug development, manufacture, control, testing and registration in both US and EU systems.

Print and electronic publishing formats via online publishing systems are continually expanded into major libraries and universities world-wide (Locum Journal Navigator System).
