

TECHNOLOGY LEVELS

Class One - Open

Handbook Development Technology --- \$495 (Per part)

Handbook of Generic Drug Development is *open to the general public*, - world wide **without** membership to the Drug Development Association - IAGIM. Handbooks for Generic Drug Development are available in two technical parts - Part I is technical development and Part II Technical ANDA data and data bases. Presented at an University graduate level to technical pharmaceutical scientists. Includes 80-90% of IAGIM data and bases. Each handbook covers the technology for one specific drug.

Class Two - Open

READY-to-GO™ CMC SERIES TECHNICAL 'KNOW-HOW' FILES
PART I & II --- \$ 999 (Open)

Firms purchasing drug specific 'know-how technology' (from the +120 list) are open to ordinary membership of the Drug Development Association (IAGIM) only. Files includes 100% of IAGIM data bases and updated annually to members. Know-how technology may be open (free to any MEMBER - Class 2) or closed (restricted and exclusive to one specific firm only - Class 3) in each target country.

Class Three - Exclusivity

TECHNICAL KNOW-HOW FILES --- \$ 2995 (Closed)

Know-how technology in this class is exclusive and restricted to a specific user firm in each country (one user firm per country - excluding USA), but **not** for export to any other organisations or countries.

TECHNICAL KNOW-HOW FILES - per additional country \$ 3000 (Closed)

Know-how technology for export to **additional** countries via a licensed agreement to the specific user firm for a stated number of **additional** countries. The EXCLUSIVITY fee above is paid for **EACH** additional country where the specific user firm intends to export the finished manufactured product it produces, based on the association's know-how technology.

Yours Sincerely,

Dori Belle
